

Implant Appointments and Time for Implant Placement in Healed bone

Appointment # 1: 30 minutes-1.0 hour.

Data Collection: Examination, take photos, x-rays, CBCT scan .

Appointment #2: 30 minutes-1.0 hour.

Present Treatment plan, discuss risks, benefits, alternatives, costs, and review x-rays, photos, refer to specialists if you like to have second opinion.

Appointment #s 1, 2 can be combined with #3 if necessary.

Appointment #3: 1.5 hours

Place implant (**if adequate bone and primary stability allowed**) no bone graft needed.

For the back teeth like bicuspids and molars, a permanent ZrO₂ or Titanium abutment placed, take final impression, then a short temporary crown or veneer can be placed for cosmetic reason.

For the front teeth like canines and incisors, a permanent ZrO₂ or Titanium abutment, take final impression, then a short temporary crown or veneer can be placed for cosmetic reason.

Then wait 2-4 months prior to placing permanent crown.

Appointment # 4: 1 hour

Deliver or cement permanent crown.
